In 1910 there were received at the Patent Office in Washington 63,293 applications for mechanical patents, 1,155 for design patents, 181 for reissues of patents, 6,843 for registration of trade marks, 755 for registration of labels and 226 for registration of prints. There were 35,807 patents issued, including designs; 125 patents reissued and 4,329 trade marks, 370 labels and 120 prints registered. The number of patents that expired was 22,768. The number of allowed applications, awaiting the payment of final fees, was 11,336, and the number forfeited for non-payment of the

final fees, 7,442. The total receipts were \$2,325,537; the expenditures, \$2,005,712, and the surplus of receipts over expenditures, \$319,825. The total balance to the credit of the Patent Office in the Treasury of the United States on December 31, 1910, was \$6,998,228.

As to foreign patents, 1,053 were granted last year to citizens of Germany, 894 to those of England, 534 to those of Canada, 315 to those of France, 139 to those of Austria-Hungary, 124 to those of Sweden, 77 to those of Switzerland, 67 to those of Scotland, 66 to those of Victoria, 61 to those of Belgium, 47 each to those of Italy and Russia, 35 to those of Norway, 31 to those of Mexico, 30 to those of New Zealand, 28 each to those of Denmark and Transvaal, 23 to those of New South Wales, 18 to those of the Netherlands, 12 to those of Ireland, 9 each to those of Cuba and Spain, 8 each to those of Argentina and Japan, 5 to those of Natal, 3 each to those of Brazil, Colombia, Guatemala, India, Java, Luxemburg, Roumania and West Australia, 2 each to those of the British West Indies, Cape Colony, Costa Rica, Egypt, Ecuador, Newfoundland, Orange River Colony, Queensland, South Australia and Turkey, and 1 each to those of Chile, China, Isle of Man, Peru, Portugal, St. Lucia (West Indies), Transvaal, Uruguay and Venezuela.

From the earliest period in 1870 inclusive the United States issued 120,573 patents and foreign countries, 238,437; from 1871 to 1910 the United States granted 869,561 and foreign countries 1,899,654 patents, making the totals to December 31, 1910: United States, 900,134 (including 9,857 issued prior to July 1, 1836), and foreign countries, 2,138,091. The aggregate number for the United States far exceeds that for any other nation, Germany ranking second, with a total of 440,898 patents; Great Britain next, with 425,374; France following with 248,106, Belgium with 237,500 and Canada with 133,690.—Daily Consular Reports.

FIRST AID.

During the warm weather, attacks of diarrhoea are very frequent and often are so swift in their results that life is in danger before a physician can be summoned. Every man who has the interest of his family at heart should keep a reliable remedy in his home for immediate use in cases of this kind. Chamberlain's Colic, Cholera and Diarrhoea Remedy is, without doubt the best remedy prepared for diarrhoea. It should be given if possible, at the first unusual looseness of the bowels. For sale by all dealers. Benson, Smith & Co., agents for Hawaii.

WHY WOMEN CAN STAND

COLD WEATHER

Why can apparently fragile women wear pneumonia blouses in the arctic springs of the British Isles? Why can they walk about in the thinnest of shoes and transparent stockings when the temperature is below the freezing point? Why can they do these things and wear an evening costume which would be fatal to the majority of men and yet suffer no harm?

These are questions that have puzzled the London Daily Mirror. To solve them it applied to "an experienced doctor who has studied the subject." He had been puzzled by the same problems. He knew that women's skin was more tender than men's and their

constitutions generally less able to stand cold and wet, so he looked into the matter.

He then discovered that "women have a special layer of fat all over their bodies, thicker than man's and acquired when human kind dwelt in caves and huts." "In those days," he argued, "the men were able to keep themselves warm by hunting and fighting." * * * The women had to stay at home in the cave to look after the baby and cook her husband's dinner whenever he might bring it in.

And caves or huts must have been chilly abodes in keen weather with an east wind blowing; and women, who had no hunting to warm their blood and enable them to resist cold, suffered accordingly.

"So mother nature set to work and gradually built up on women a special layer of protective fat. That took a few thousand years probably, for nature never works in a hurry, since time is no object to her; but bit by bit the work was completed."

EPWORTH LEAGUE AT

LEAH HOME YESTERDAY.

The Epworth League of the First Methodist Episcopal church had charge of the service at the Leah Home yesterday afternoon. The meeting was a very enjoyable one and was well attended. Mr. and Mrs. Bishop were present and gave several very beautiful selections on the guitar and zither upon which instruments they are finished artists. Mrs. Bowen, who has recently returned from a year's trip to Australia, gave a very helpful and interesting talk. The meeting was led by John Martin. Mrs. C. H. Thayer of Anaheim, Cal., read the lesson and led in prayer. C. J. Day and Frank Cook were also present and spoke briefly. These weekly meetings are very helpful and are enjoyed by the inmates of the institution, who look forward to them with anticipation all through the week.

Facts
About
Motherhood

The experience of Motherhood is a trying one to most women and marks a distinctly epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at the time of child-birth, but many approach the experience with an organism unfitted for the trial of strength, and when the strain is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, women will persist in going blindly to the trial. It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy, and strong.

Any woman who would like special advice in regard to this matter is cordially invited to write to Mrs. Pinkham at Lynn, Mass. Her letter will be held in strict confidence.
